

CHARU SONKER

FULL STACK DEVELOPER | AI-INTEGRATED WEB APPLICATIONS

Lucknow, India • +91-8318129536 • csonker04@gmail.com • Portfolio • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying production web applications using React.js, Node.js, Express.js, MongoDB, SQL, REST APIs, and AI integrations. Experienced in developing responsive interfaces, backend services, real-time applications, CRM platforms, and AI-powered web products. Strong foundation in JavaScript, Python, C++, database design, API integration, authentication, Git/GitHub, and modern web development.

EDUCATION

B.Tech in Electrical and Electronics Engineering — Galgotias College of Engineering and Technology, Greater Noida Completed 2026
Diploma in Computer Science Engineering — Glocal University, Saharanpur 2020 – 2022

TECHNICAL SKILLS

Programming: JavaScript (ES6+), Python, C++, SQL
Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, iOS, Responsive Design
Backend: Node.js, Express.js, REST APIs, WebSockets, Socket.io, JWT Authentication, SaaS
AI / ML: OpenAI API, Prompt Engineering, TensorFlow.js, Generative AI Integration, AI Tools
Databases: MongoDB, Mongoose, SQL, Supabase, Schema Design, Query Optimization
Tools & Engineering: Git, GitHub, Docker, AWS, Postman, VS Code, Vercel, Netlify, Render, CI/CD, Agile, MVC Architecture

PROFESSIONAL EXPERIENCE

Full Stack Developer | Volna Technologies July 2026 – October 2026 (Expected)
• Engineered and deployed responsive full-stack web applications and reusable React.js components with modern JavaScript (ES6+).
• Developed scalable backend services and RESTful APIs using Node.js and Express.js for asynchronous data flows.
• Designed and optimized MongoDB database schemas, ensuring query performance, data integrity, and indexing efficiency.
• Implemented secure token-based authentication (JWT) and collaborated via Git/GitHub version control workflows.

Web Developer Intern | Empire IT Xpert April 2026 – June 2026
• Built responsive front-end user interfaces, dynamic dashboards, and workflows for CRM web platforms using React.js and Tailwind CSS.
• Implemented Node.js and Express.js REST APIs for business data pipelines, form handling, and role-based access control (RBAC).
• Collaborated on Git/GitHub version control workflows for client requirements, sprint feature delivery, and cross-browser testing.

Web Developer Intern | Hi-Tech Engineering July 2025 – September 2025
• Shipped 3+ responsive MERN stack applications, lifting cross-device compatibility by 40% and cutting data-fetch latency by 25% through optimized REST API integration.
• Redesigned MongoDB schemas and implemented indexing for Node.js/Express services, improving database query performance by 30%.
• Raised Core Web Vitals scores by 35% through lazy loading, code splitting, and asset compression.
• Collaborated within a 5-member Agile team using Git and GitHub for version control and sprint delivery.

SELECTED PROJECTS

Pixel Art AI Studio [Live Demo](#)
React.js | Node.js | Express.js | MongoDB | REST APIs | HTML5 Canvas | Vercel
• Engineered an AI-driven image processing application with HTML5 Canvas quantization and algorithmic color clustering to convert user uploads into stylized pixel art.
• Built full-stack Node.js/Express REST API endpoints for batch processing, image filtering, and optimized downsampling pipelines.
• Deployed responsive web tool on Vercel featuring real-time client-side preview, palette extraction, and multi-format export.

Nexus360 CRM [Live Demo](#)
React.js | Node.js | Express.js | MongoDB | Tailwind CSS | REST APIs | JWT Auth
• Developed a full-stack operations CRM platform featuring Role-Based Access Control (RBAC), multi-stage lead tracking, and responsive dashboard analytics.
• Implemented secure JWT authentication and token-based middleware protecting operational routes, business data, and document workflows.
• Designed compound-indexed MongoDB schemas with Express REST APIs to accelerate high-volume customer queries and pipeline updates.

Sketch Duel AI — Doodle Battles [Live Demo](#)
React.js | Node.js | Socket.io | MongoDB | OpenAI API | JWT | HTML5 Canvas
• Built a real-time multiplayer drawing web application with Socket.io WebSockets delivering sub-100ms bidirectional stroke synchronization and live lobby management.
• Integrated OpenAI API for dynamic AI sketch recognition and automated scoring, paired with JWT authentication and MongoDB match records.

LEADERSHIP & ACHIEVEMENTS

- Head of Marketing & Sponsorship Club:** Secured 8+ corporate sponsorships, increasing event funding by 60% and driving 200+ attendee turnout.
- IEEE Conference Volunteer:** Coordinated technical sessions and logistical operations for 200+ international attendees.
